Dear Sir/Madam,

I'm Antonio Papa I have 5+ years at programming I'm always trying to experiment new tools and new technologies and obsessed in keeping the code clean and functional.

I have almost 6 years experience with PHP and I have worked with different frameworks like Laravel, Zend and Qcubed.

For the Frontend I have worked Angular 2 and 4 lately along with SASS, pug, gulp, JQuery etc.

I am familiar with all the OS types and I have good experience with git.

For the database I have worked mostly with MySQL and have built complex queries over the years.

I would like to apply for this position because I think I am qualified for the requirements and want to work with the best companies to improve myself and do exciting projects.

Looking forward to hear from you.

Kind regards,

Antonio Papa
