Experience

Team Lead / Full Stack Developer   jan 2018

Mitra Intelligence - Berlin, Germany

- Build a scalable platform that was accessed by thousands of users per day.
- Lead a small group of developers to create a scalable Single Page Application and API.
- Used the microservices architecture to split two different teams independent of each other to work on the same goal.
- Responsible for introducing the API composition pattern using internal API's and combining them on runtime instead of database joins.
- Developed multiple, reusable and easily customizable frontend apps in Angular.
- Responsible for setting up the payment system of the app using Stripe.
- Responsible for building the translation system that can be easily extended in multiple languages.

Full Stack Developer   aug 2017 - dec 2017

Mitra Intelligence - Berlin, Germany

- Responsible for maintaining the live app and creating the new API.
- Developed the image structure where every image upload would crop the image in different sizes and assigned a different tag.
- Created functional tests that tested the API and browser behaviour.
- Migrated the database tables to a better structure while maintaining the app functionalities.
- Refactored legacy code to readable and maintainable code.

Full Stack Developer   nov 2014 - jun 2017

Ploomo - Tirana, Albania

- Developed widgets that you could paste a simple code in our client sites and we would generate live matches and live league rankings.
- Worked with real-time data showing live football matches scores.
- Developed a multi-registration module where you could register to multiple betting sites using only one registration form using phantomJS.
- Refactored legacy code to readable and maintainable code.

Web Developer   mar 2013 - oct 2014

Manoolia - Tirana, Albania

- Worked and created multiple Wordpress apps for different clients.
- Converted PSD files to responsive HTML5 and CSS3 templates to Wordpress apps.
- Developed Wordpress plugins that they were released in the Wordpress market.

Web Developer   oct 2011 - oct 2013

RT Design Group - Tirana, Albania

- Responsible for maintaining the app and building new features.
- Developed the admin area where you could log in CRUD records.
- Developed multi-access roles where users with different rights could do different things.
- Used Apache Lucene to improve the search performance.

Skills

- Experienced: Python (Flask), C# (Xamarin, .NET) , Java (Vaadin), React, VueJs, Kubernetes
- Proficient: PHP (Laravel), Javascript (Angular) , SQL, Docker
